

Large Enterprise Food Company

Introduction

This case study of a large enterprise food company is based on a December 2016 survey of Cyphort customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“Our overall experience with Cyphort has been very positive. The modern security product market is difficult to navigate. Finding vendors that sell products and not a feature is becoming increasingly harder. Finding vendors selling products with an achievable vision or ‘future proofing’ your investment is even more rare. Cyphort does the latter for us.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Cyphort:

- Purchased Cyphort for the following reasons:
 - Easily integrates with existing infrastructure
 - Strong detection of advanced threats hiding in web, email, and lateral spread traffic
 - Flexible deployment on commercial servers, VMs, and cloud – no specialized appliances required
 - Ability to deploy across multiple sites and manage as a single system
 - Newly discovered threats are prioritized for security teams based on risk and severity
 - Cost effective

Use Case

The key features and functionalities of Cyphort that the surveyed company uses:

- Uses the following in conjunction with their Cyphort Infrastructure:
 - Palo Alto Networks
 - Carbon Black
 - Intrusion Prevention System
 - Other SIEM
- Uses Cyphort for the following:
 - Its web collectors that are positioned at their network perimeter to detect threats as they enter or exit their network
 - Positioning collectors to examine traffic as it traverses their network laterally to look for threats spreading internally in their network
 - To integrate with their SIEM or other orchestration tools to provide additional intelligence around potential threats

Results

The surveyed company achieved the following results with Cyphort:

- Evaluated the following vendors before choosing Cyphort:
 - FireEye
 - Palo Alto Wildfire
- Rated Cyphort’s following capabilities when compared to the competition:
 - Performance: better
 - Ease of use: significantly better
 - Accuracy: better
 - Manageability: better
 - Scalability: better
 - Support: better
- Saw the following benefits after deploying Cyphort:
 - Improved false positives, unnecessary machine re-imaging and the efficiency of Incident Response Team
 - Improved network, email, and lateral visibility
 - Met regulatory compliance standards

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Large Enterprise
