

# GIGAMON

**Product Name:** Gigamon Visibility Fabric

**Main Website:** <https://www.gigamon.com>

**Product Website:** <https://www.gigamon.com/unified-visibility-fabric>

## Product Integration Type

Other: SPAN/TAP

## Integration Objective

Gigamon can be used as a SPAN device to mirror traffic to ADF collectors.

## Customer Value Proposition

Gigamon provides ADF a SPAN device to monitor traffic.

## Tested Vendor Versions

N/A

## Integration Classification

Other: SPAN/TAP

## Integration Details

Enterprise. Can work in large environments with a variety of integration points.

## Integration Method

Other: SPAN/TAP device

## Integration Detail Summary (API, CLI)

- ▶ Gigamon aggregates and forwards a copy of the relevant production traffic
- ▶ Gigamon can distribute flows across multiple Cyphort collectors

## Cyphort Manager GUI Component

No

## GUI Operational Use Case

N/A

## Threat Score Impact

No

## Integration Documentation

N/A

## Integration Demo

No

---

### About Cyphort

Cyphort is a privately held cybersecurity company founded in 2011 and based in Santa Clara, CA. The company provides SMB and enterprise customers with the Anti-SIEM, an open, scalable software platform that combines advanced threat detection, analytics, and mitigation capabilities. The solution minimizes the cost and complexity of traditional SIEMs, while delivering immediate, actionable insight into security incidents for fast threat resolution.
